SUMMARY

Frontend developer with hands-on experience building responsive web applications using React and Next.js, including production UI work on e-commerce platforms. More recently, built a multi-user expense tracker with real-time analytics and Excel export, and a product browsing app using Next.js's App Router — applying deliberate state management, runtime theming, and performance optimizations throughout.

SKILLS

Core / Hands-on: JavaScript, React.js, Next.js, Redux Toolkit, React Router, HTML, CSS, SCSS, Bootstrap, Git, GitHub

Other Skills (Basic Knowledge): Node.js, Express.js, MySQL, MongoDB, JSON Web Token, bcrypt, Material UI, Tailwind CSS, JIRA, Figma

PROFESSIONAL EXPERIENCE

Trainee, IT Department

Jan 2023 – Nov 2023

Fortune4 Technologies

- Worked hands-on with React.js, Next.js, Node.js, and MySQL across live client projects
- Built UI functionality including product search, ratings and reviews, wishlist, and filters
- Implemented routing, forms, and SEO-optimized pages using Next.js and next-seo

Data Center Operation Engineer

Oct 2020 – Jun 2022

Acute Informatics Pvt Ltd (HDFC Bank, Mumbai)

- Gained foundational exposure to HTML, CSS, and JavaScript during this period
- Began the transition toward frontend development through self-driven learning

PERSONAL PROJECTS

Expense Tracker *(React, Redux Toolkit, Vite, React Router, SCSS, Recharts, ExcelJS)*

Multi-user expense tracking SPA with per-user data isolation, analytics dashboard, transaction history filtering, and client-side Excel export.

Personal Portfolio Website *(Next.js 16, React 19, SCSS Modules, Web3Forms)*

Production-quality developer portfolio built with the App Router and Server Components by default. Implements light/dark theming via CSS custom properties with a no-flash hydration strategy, dynamic SEO metadata and Open Graph image generation, a working contact form integration, and full responsive and accessibility passes (WCAG-compliant contrast, keyboard navigation, reduced-motion support).
